LobbyGuard Visitor Management System

- Visitors sign-in via the easy-to-use TOUCH SCREEN INTERFACE
- Information collected is printed on a HIGHLY VISIBLE VISITOR BADGE
- Visitors may SIGN-OUT via the touch screen application or via the BARCODE SCANNER option
- REAL-TIME VISITOR REPORTING provides crucial information in the event of an emergency situation.
- SCREENING FEATURE deters unwanted visitors reducing the potential for violence, damage or theft.
- TOUCH SCREEN TECHNOLOGY and easy-to-follow instructions for fast and easy visitor registration.
- PASSWORD PROTECTED DATABASE ensures the privacy of your visitor log.

LobbyGuard™ is a computerized visitor management system designed to help public and private institutions maintain control and more effectively manage their visitor activity.

LobbyGuard's user-friendly touch screen kiosk and step-by-step audio/visual instructions walk the visitor through the sign-in process. The visitor's information and photograph are quickly captured and stored in a secure, historical database.

LobbyGuard's intuitive touch screen technology captures pertinent information regarding each visitor including the individual's name, affiliation, photograph, date, time and duration of their visit. Once the visitor's information has been captured,

LobbyGuard prints an easy-to-see visitor badge which allows security personnel and building employees to identify each visitor at a glance.
